## DETAILED ACTION

### *Response to Amendment*

1. In response to the Amendment received on October 6, 2003, the examiner has carefully considered the amendments.

### *Response to Arguments*

2. Applicant's arguments, see Response, filed October 6, 2003, with respect to claim 26 have been fully considered and are persuasive. The rejection of claim 26 under 35 USC 102(b) as being anticipated by Gente et al (De 198 03 302) has been withdrawn.

### *Allowable Subject Matter*

3. Claim 26 is allowed.
4. The following is an examiner's statement of reasons for allowance: The primary reasons for allowance is the use of a mask fitted over a light energy source for exposing at least one segment of a dental composite material while selectively limiting exposure of at least one substantially adjacent segment of the dental composite material to said light energy source, such that the stress occurring over the entire composite-to-composite sub-interfaces, which substantially prevents overall polymerization stress being transmitted to the composite-to-tooth interfaces or being passed through the interface into the tooth structure. While the prior art is concerned with the problem of polymerization stresses occurring during curing of dental composites, the prior art does not expressly teach and/or fairly suggest using a mask to cure only portions of dental composite compositions, while limiting the exposure of the adjacent dental composite composition. The prior art teaches

modulating the light intensity, wavelengths, and/or times of exposure or segmental curing or curing using different types of light sources. Therefore, the instant invention is distinguished over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
